HI/LO Temperatures Records

The indoor and outdoor HI/LO temperature records will reset daily at midnight. This provides a daily 24 hour HI/LO reading.

View HI/LO Temperature Records:

Press and release the + button to view in order:

- Outdoor HI temperature
- Outdoor LO temperature
- Indoor HI temperature
- Indoor LO temperature

English	HI	LO
Español	AL	BA
Français	HA	BA

Manually Reset HI/LO Records:

Hold the + button for 5 seconds to reset all temperature records.

Temperature Trend Arrow

The temperature (2°F / 1°C) trend indicators update every 30 minutes. The trend reflects changes over the past 3 hours.

E.G.: At 3:00 — compares to 12:00 data; at 3:30 — compares to 12:30.

Temperature increased in past 3 hours 	Temperature did not change in past 3 hours 	Temperature decreased in past 3 hours 
---	--	---

Search for Outdoor Sensor

- Press the + button to search for the outdoor sensor.
- The strength signal icon will animate until the sensor signal is received or for 3 minutes if no signal available.

Position Outdoor Sensor

- Mount the Outdoor Sensor on a north-facing wall or in any well shaded area. Under an eave or deck rail is preferred.
- The maximum wireless transmission range to the alarm clock is over 300 feet (91 meters) in open air, not including walls or floors.
- Be sure the outdoor sensor is mounted vertically.

Restart

When the outdoor readings show dashes:

- Bring the sensor in the house five feet from the station.
- Remove batteries from the sensor, as well as, the batteries and AC adapter from the station.
- Press any button 20 times.
- After 15 minutes insert batteries into the sensor, as well as batteries and AC adapter into the station.
- Wait 15 minutes to establish a strong connection. Place sensor outside in shaded location.

Low Battery Icons

The Low Battery Icon indicates when batteries are in the station or sensor.

- If the icon is displayed by the outdoor temperature, replace the batteries in the outdoor sensor.
- If the icon is displayed near the indoor temperature, replace the batteries in the station.

Care and Maintenance

- Do not mix old and new batteries
- Do not mix Alkaline, Standard, Lithium or Rechargeable Batteries
- Always purchase the correct size and grade of battery most suitable for intended use.
- Replace all batteries of a set at the same time.
- Clean the battery contacts and also those of the device prior to battery installation.
- Press Ensure the batteries are installed with correct polarity (+ and -).
- Remove batteries from equipment which is not to be used for an extended period of time.
- Remove expired batteries promptly.

Specifications

Indoor Temperature:	32 F to 122 F (0C to 50C)
Outdoor Temperature:	-40 F to 140 F (-40C to 60C)
Power for Station:	5 volt AC adapter primary
Adapter Number:	GPU280500150WDOO
Optional Batteries:	2 AA LR6 batteries.
TX141-Bv2 Sensor:	2 AA LR6 batteries
Battery Life:	24 months with reputable batteries brands
Station:	5.98" H x 3.25" W x 2.17" D (152 x 82.5 x 55 mm)
Sensor:	5.12 " H x 0.82" W x 1.57" D (40 x 20.8 x 130mm)

Warranty and Support

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device must not be co-located or operating in conjunction with any other antenna or transmitter.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
